AED Plus

The ZOLL AED Plus does more than just defibrillate, it is the only AED that ensures rescuers respond appropriately whilst resuscitating a victim of sudden cardiac arrest. How? It coaches them quickly and simply through every important step of the rescue process. Only the AED Plus with its exclusive, one-piece electrode can measure the rate and depth of chest compressions during CPR. It immediately tells rescuers how well compressions are being performed using ZOLL’s unique Real CPR Help technology. A recent clinical study demonstrated that a person would be 2.72 times more likely to survive a cardiac arrest with a ZOLL defibrillator due to Real CPR Help technology.*

- Real CPR Help technology provides real-time feedback on the rate and depth of chest compressions – the only AED on the market that can see what you’re doing during CPR
- Once installed, the AED Plus has the lowest total cost of ownership
- Supports the UK Resuscitation Council’s entire Chain of Survival, with easy-to-understand audio prompts and illustrations
- Easy to place one piece electrode providing more time to focus on the rescue
- Paediatric pads available for children up to 8 years old
- Paediatric pads available for children up to 8 years old
- The specially designed lid for the AED Plus can be placed under the shoulders of the patient to help maintain an open airway
- Best Ingress Protection (IP) rating for dust and water. The AED Plus has an IP rating of 55, the highest IP rating of any AED on the market today
- Automated self testing every 24 hours to ensure a constant state of readiness
- First Responder Kit supplied with every device to aid rescuers in delivering CPR
- The batteries can be purchased at most retail stores making it easier to replace when needed
- 7 year warranty (5 years as standard, 2 years free upon registration)

AED Pro

The most rugged, full-featured AED for professional rescuers designed with advanced capabilities, the ZOLL AED Pro supports Basic Life Support as well as Advanced Life Support professionals. A high-resolution LCD display allows responders to visualise a patient’s ECG while utilising a 3-lead monitoring cable. Unique to ZOLL AEDs is a real-time feedback mechanism, known as Real CPR Help which allows rescuers to see and hear how well they are performing the rate and depth of chest compressions during CPR.

- Real CPR Help provides real-time feedback for rate and depth of CPR chest compressions
- See-Thru CPR filters CPR artefact to display patients underlying heart rhythm
- Available in semi-automatic, semi-automatic with manual override and manual mode only
- Advanced capabilities, including 3-lead patient monitoring and manual override
- The only AED that has an IP55 dust-water rating and passes the 1.5 metre drop test
- Battery and electrode compatibility with ZOLL’s line of professional defibrillators
- Paediatric pads available for children up to 8 years old
- Automated self testing to ensure a constant state of readiness

Laerdal HeartStart FRx automated external defibrillator

- Conforms to European Resus Council Revised Guidelines December 2005
- HeartStart FRx is easy to use, rugged and reliable, it is ready when needed, with a minimum of maintenance required
- FRx assists the rescuer with guiding voice prompts and visual icons in all the critical steps of resuscitation including CPR
- A simple 1-2-3 operation:
  1: Turn on
  2: Apply pads
  3: Press to shock

SMART biphasic
Low energy 150-joule shock, proven performance in published studies of out-of-hospital cardiac arrest, and recommended in international resuscitation guidelines as acceptable, safe and useful, and intervention of choice

SMART pads
Are able to sense whether they have been removed from the cartridge and placed on the patient’s chest so as to ensure that the voice prompts keep pace with you

Capacity
When new minimum 90 shocks or 3 hours of operating time

- FRx will analyse fast, a rescuer can deliver shock within 10 seconds
- Designed to work where rescuers have to operate, in the rain, onboard aircraft, on metal surfaces, in industrial areas
- The FRx can withstand jetting water, loads up to 250kg and 1 metre drop to a concrete floor
- Internal self testing, daily, weekly and monthly, including pad connection and full energy charge/discharge
- Visual status indicator and audio signal in event of a problem
- No regular or contractual technical maintenance programs required
- Wireless data transfer capability, additional software required
- Battery life is minimum 200 shocks or 4 hours of operation time, up to 4 year shelf life
- Preconnected SMART II pads, one size pad for all patients and children
- For use on infant and children a special key is required, this is inserted into the FRx to ensure the appropriate energy level is available, CPR prompts change (please order ACC383)
- FRx and its accessories are made of latex-free material
- Optional carry case available
- Dimension: 60 x 180 x 220mm
- Weight: 1.5kg

Laerdal HeartStart HS1 first aid defibrillator

Fast to learn
So simple to operate that a first aider with minimal training can potentially save life of a co-worker, friend, member of the family or the public

Easy to use
Calming natural voice instructions coach the first aider through the steps of first aid defibrillation and CPR

Always ready
Comprehensive automatic self-tests check all the HeartStart’s vital functions on a daily, weekly and monthly schedule, so as to ensure that HeartStart is always ready for emergency life saving

SMART analysis
So accurate that HeartStart is the only automated external defibrillator approved for use on children as well as adults

Guarantee
5 YEARS

Lithium manganese dioxide battery
9VDC 4.2 Ah

Stand-by life
Typical 4 years (after insertion)

Training life
A minimum of 10 hours of use in training mode

HeartStart carry case
Comes with an accessory kit containing Laerdal face shield, scissors and a paper cloth

- ACC380 Defibrillator, 1 battery & 1 pair of SMART pads II £1400.00
- ACC382 Defibrillation pads, 1 Set £45.00
- ACC305 Battery HS1, type MS070A £136.00

## Powerheart G3 Automatic

- **The Powerheart AEDs are Rescue Ready,** meaning they self-test daily to ensure they work whenever needed.
- **The AED analyses the heart rhythm and “knows” when to deliver (or not deliver) the shock.**
- **The AED Automatic Defibrillator (ACC201) delivers a shock automatically, without requiring the user to press a shock button.**
- **Voice prompts are clear concise guiding user through the rescue.**
- **Text screen display guides the user through rescue process as well as additional critical rescue information for EMS responders.**
- **Paediatric capability.**
- **To ensure anytime functionality, the AED self checks all main components, battery, hardware, software, and pads every day.**
- **Once a week the AED completes a partial charge of the high-voltage electronics.**
- **Once a month the AED charges the high-voltage electronics to full energy.**
- **When the unit needs to be serviced the Rescue Ready status indicator on the handle changes from green to red and the device will emit an audible alert to prompt the user to service the unit.**
- **Dimensions (hxdw): 80 x 310 x 270mm.**
- **Weight: 3.1kg.**

HeartReset AED

- HeartReset is a highly advance and easy to operate AED
- Extremely reliable – 10 years of development
- Available in semi or fully automatic versions which include bag and accessories
- The semi-automatic unit requires user assistance to press the shock button if required whilst the fully automatic version does not need user assistance
- Provides verbal and visual instructions
- Audible beat to ensure correct rhythm during heart massage
- Comes with 6 years warranty (this excludes electrodes and battery cartridge)
- Dimensions: 220 x 275 x 85mm
- Weight: 2.6kg
- Device Class IIb

HeartReset AED in sturdy bag complete with contents as follows:
- 1 set of electrodes
- Scissors
- Razor
- Aspiration mask
- Gloves
- USB cable
- CD manual in 11 languages

Optional on-line training available for £9.89 for a 1 year license
- The license key for this will be distributed on receipt of an email after purchase

Vitolograph resuscitation and suction kit comprising:
- Autoclavable resus bag, adult
- Emergency aspirator
- Airways: 1 of each size: 1, 2 and 3

• Complete in case
• Dimensions (hxdw): 345 x 305 x 135mm
• Weight: 2.2kg

ACC591 Resuscitation kit small £289.00
DIS354 Duracell C size batteries, pack of 2 £3.04

Response kit

- Suitable for blood, vomit and urine spillages
- 2 applications

Contains two sets, each comprising:
- Gloves
- Apron
- Scraper
- Dry wipe
- Disinfectant wipe

- 30ml disinfectant spray
- 10g absorbent powder
- Disposal bag
- Scoop
- Data sheet and full instructions

DIS788 £15.12

AuraOnce disposable laryngeal mask

• Features a special curve that carefully replicates natural human anatomy, ensuring the patient’s head remains in a natural, supine position when the mask is in use
• Single-patient use reduces the risk of cross-contamination and other associated hazards
• Anatomically correct curve that carefully replicates the natural human anatomy. It is moulded directly into the tube so that insertion and removal is easy and it does not abrade the upper airway
• The extra soft cuff is only 0.4mm thin to ensure the best possible seal with least intra-cuff pressure
• The cuff and the airway tube have been moulded as a single unit and so the sides are smooth and there are no ridges or fins that can scratch the delicate tissue
• The airway tube is flexible at the cuff and rigid at the connector for easy, atraumatic insertion and removal
• A practical, clear ‘window’ has been incorporated into the design so that condensation can be viewed
• The ultra thin pilot balloon, with universal check valve, provides precise, tactile indication of the degree of inflation
• The re-inforced tip will not bend during insertion so positioning is always correct
• The Ambu laryngeal mask is completely MRI compatible

ACC54201 Patient weight 30 – 50kg £6.99
ACC54202 Patient weight 50 – 70kg £6.99
ACC54203 Patient weight >70kg £6.99
The VP25 is easily moved to where it’s needed fast, with its compact suction unit that also delivers a powerful performance. Its high collection capacity makes it ideal for emergency oral, nasal and tracheal suction. The 2 litre suction unit is available with disposable liner system.

- Large convenient fold down carry handle, and an oil filled rotary pump, for trouble free operation
- Clear, simple controls – vacuum gauge graduated in mmHg and kPa
- Simple rotary control for suction level
- Cable stowage on back with reversible cleats for secure stowage and rapid deployment of cable
- Operational hydrophobic filters protect the pump from accident overflow by preventing liquid from passing
- Easy change plug in filter mount for rapid replacement of filters
- Filter and disposable liner features minimise the risk of cross infection

Laerdal suction unit

As one of the most reliable portable suction units on the market, the Laerdal suction unit (LSU) enables providers to clear airways quickly and efficiently. With its built-in LED vacuum indicator and sturdy design, the LSU can be an invaluable asset in an emergency situation. Setting the standard for suction units, the LSU is used all over the world by countless providers. For ease of use in difficult situations, the LSU has a built-in suction indicator for the correct vacuum needed for children, in the form of color coding. In extreme situations the LSU can reach a vacuum of 500+ mmHg and has a flow rate of >25 LPM, exceeding International Standards. Combined with the extra-large dial for ease of use with large gloves, the LSU enables providers to quickly select the correct amount of suction for any given situation. The suction unit’s quiet running and shock & splash proof design makes it an excellent option in nearly all settings.

As part of the ongoing process to improve our products, all LSU orders are now filled with the latest Serres configuration. This configuration makes it easier to visualize the fluid volume in the canister, replaces vacuum tubing with the Serres vacuum connector, and has an improved canister holder for easy canister release.

- Battery should be replaced every 3 years to guarantee power levels

Reactive or semi disposable?

The LSU comes in 2 different configurations, so that you can choose the product that best suits your needs. Choose either the Laerdal reusable canister LSU with completely reusable parts, or the Laerdal preferred Serres configured LSU that comes with a reusable canister and disposable liner to avoid contact with contaminants.

Ready for use

Because the Laerdal suction unit automatically charges when connected to an external power source, and charges to 80% after just 3 hours, it is ready for use when needed. For the assurance you need, the LSU device test will tell you in 10 seconds whether the LSU is ready for use in the field. The test includes four important requirements for the LSU to pass.
VacuAide QSU portable suction unit

- Available as a battery version for ambulatory use (7314P series) or as a “mains-only” operated model (7314D series) for home use
- 3 collection canister systems to choose from:
  - Classic 800ml disposable canister,
  - QSU 800ml disposable canister,
  - QSU 1200ml re-usable canister
- High performance capabilities with a vacuum range of 50 – 550mmHg and a flow range of up to 27 l/min
- Low noise level without compromising suction performance
- Comes complete with multi voltage power supply, rechargeable battery, 12v DC in car charger and personal carry case
- Multi voltage switch mode power supply allows operation on any AC voltage 100v – 240v
- Personal carry bag allows the device to be used without removing it (bag comes complete with the battery version only)
- Accessories can be stored and carried with the unit as the carry bag features additional storage pockets including pull down flap for the user to view the contents of the canister whilst in use
- A fully charged battery lasts for up to 60 minutes runtime
- Built to comply with the ISO 10079-1 standards
- Large, rotating, easy grip pressure adjustment gauge allows the user to easily view and set the required suction pressure

ACC719 | £465.00

Compact 525 oxygen concentrator

- Weighing only 16.3kg, the 525 concentrator is the smallest and lightest 5 litre concentrator from DeVilbiss Healthcare
- Intelligent power management system utilises “turn-down” technology providing the lowest possible power consumption at 2 l/min
- New maintenance free rotary valve
- OSD Sensor for continuously monitoring oxygen levels
- Variable flow rate up to 5 l/min at 93% ± 3% (paediatric flowmeter is available as an option)
- Visual and audible alarms for low oxygen levels, power failure, pressure drop and service required
- Low noise, quiet operation
- High oxygen concentration levels across the whole flow range (up to 5l/min)
- Moulded handgrip for easier transportation and free moveable roller base for maximum manoeuvrability
- Service and maintenance friendly

ACC020 | £1095.00
**Suction aspirator rechargeable**

- Compact rechargeable portable aspirator
- When fully charged gives up to 30 minutes continuous use
- Internal rechargeable battery, charged from 12v mains or vehicle
- 500ml autoclavable aspiration vessel
- Suction control from 0–65mmHg, up to 20 litres per minute

Oxygen mask and tubing

- Latex-free
- Medium concentration oxygen mask

Laerdal face shield with key chain

- Small on size... big on protection when you need it
- Offers protection to both rescuer and victim when used by CPR trained rescuers
- Helps overcome hesitation to start resuscitation
- Helps prevent direct contact with victim’s mouth, nose and face

ResCue pocket mask

- The Ambu ResCue mask is designed to provide protection for the rescuer when manually resuscitating patients
- It can also be used with a manual resuscitator
- Ambu ResCue mask has a one-way valve with bacterial filter that helps to protect the rescuers in an emergency situation
- It prevents direct contact with a patient’s mouth, nose and face and helps overcome any hesitations to start resuscitation
- The transparent dome allows the rescuer to visually check the patient’s airway status and the oxygen inlet (optional) facilitates increased oxygen supply to the patient
- Provided with an elastic band to place around the patient’s head

ACC057 Adult £2.31
ACC058 Child £2.31

ACC06701 Adult £5.07
